

Nodes History...

Sorry for what happened, but I found that all the history has been cleared. These were the only history logs I had saved during the last step of the project while testing availability and running a MapReduce job.

If you're asking about the history of running processes on the nodes, everything has been automated using start-cluster.sh

```
root@node01:~# history
```

- 1 history
- 2 exit
- 3 jps
- 4 exit
- 5 hdfs namenode -format
- 6 hdfs namenode -stop
- 7 hdfs --daemon stop namenode
- 8 jps
- 9 rm -f /tmp/hadoop-root-namenode.pid
- 10 rm -rf /opt/hadoop/dfs/name/*
- 11 rm -rf /opt/hadoop/dfs/data/*
- 12 hdfs namenode -format
- 13 hdfs namenode -initializeSharedEdits
- 14 hdfs zkfc -formatZK
- 15 hdfs haadmin -getAllServiceState
- 16 ls /tmp
- 17 hadoop-root-namenode.pid
- 18 rm -f /tmp/hadoop-root-namenode.pid

```
19 ls /opt/hadoop/logs | grep namenode
20 tail -50 /opt/hadoop/logs/hadoop-*-namenode-*.log
21 hdfs namenode -format -force
22 hdfs namenode -initializeSharedEdits
23 hdfs --daemon start namenode
24 jps
25 history
```

```
root@node01:~#
```

```
root@node02:~# history
```

```
1 jps
2 hdfs namenode -bootstrapStandby
3 hdfs --daemon start namenode
4 jps
5 hdfs haadmin -getServiceState nn1
6 hdfs haadmin -getServiceState nn2
7 history
```

```
root@node02:~#
```

```
root@node02:~# history
```

```
1 hdfs haadmin -getServiceState nn1
2 hdfs haadmin -getServiceState nn2
3 yarn rmadmin -getServiceState rm2
```

4 yarn node -list
